Perceptions of Assessment and their Influences on Learning ...

With a potential economic impact between \$14 trillion and \$33 trillion a year in 2025, the value of these emerging technologies could constitute one third of global GDP. As we embrace this tech-driven economy, universities must change, too, at a pace unfamiliar to higher education. While we retain our core mission of educating the next generation and cultivating new forms of knowledge, universities must also embrace our ever-expanding role in driving innovation and catalysing economic ...
