Boatbuilding With Plywood

For most amateurs, plywood is the material of choice. Plywood is one of the cheapest and easiest building materials, one that the average do-it-yourselfer is both familiar and comfortable with. Plywood is also, pound for pound, stronger than steel. Because of its high strength to weight, plywood construction yields a boat that is much lighter [...]

In materials, BS 1088 is the British Standard specification for marine plywood that applies to plywood produced with untreated tropical hardwood veneers that have a set level of resistance to fungal attack. The plies are bonded with Weather Boil Proof (WBP) glue. Although this is a British Standard, the finished product does not have to be made in Britain, just manufactured to meet the standard.

The PM-38 Plans for the "PM-38" free motorboat plan first appeared in the August 1962 issue of the "Popular Mechanics" magazine. It was named the PM 38 because the magazine claimed that it could, not only be built in 38 hours, for a materials cost of a mere \$38 (1962 prices) but would, when launched, do 38 mph.The one pictured was built by Mark, in Harpers Ferry, West Virginia.
