The Maneuvering Characteristics Augmentation System (MCAS) is a flight stabilizing program developed by Boeing which became notorious for its role in two fatal accidents of the 737 MAX, which killed all passengers and crew on both flights, 346 people in total. MCAS was first used on Boeing KC-46 Pegasus military air tanker to balance fuel loads, but the aircraft, which was based on the Boeing ...

The Boeing B-17 Flying Fortress is a four-engined heavy bomber developed in the 1930s for the United States Army Air Corps (USAAC). Competing against Douglas and Martin for a contract to build 200 bombers, the Boeing entry (prototype Model 299/XB-17) outperformed both competitors and exceeded the Air Corps' performance specifications. Although Boeing lost the contract (to the Douglas B-18 Bolo ...
