Solving Problems: A Chemistry Handbook

A change in physical form of a substance or physical properties of a substance like color, melting point, state, size, shape, and arrangement of molecules is known as physical change. A change in chemical properties of a substance like composition, reactivity with water, corrosiveness, and pH is known as chemical change.

Chemistry: The Molecular Nature Of Matter And Change 7th ...

Change is happening all around us all of the time. Just as chemists have classified elements and compounds, they have also classified types of changes. Changes are either classified as physical or chemical changes. Chemists learn a lot about the nature of matter by studying the changes that matter can undergo.

Student's Solutions Manual to Accompany Quanta, Matter ...

Chemistry is the study of the composition, structure, and properties of matter and the changes it undergoes. Chemical deals with questions such as what is something made of, why did something react? What is a materials internal make-up, and how does it behave when heated, cooled, or mixed with another substance?
