The Custom Macro language built into CNC Simulator Pro is not 100% compatible with the original Fanuc Custom Macro B language due to the differences between a computer program and a real CNC controller. We strive to make it as compatible as practically possible but there will always be differences between the two, intentional and unintentional.

### 10.1. Introduction - Custom Macro B

Custom Macro functionality can be utilized from within any CNC program, including main programs and sub-programs. You do not have to do anything special to use Custom Macro functions in a program. Programs can reside in CNC memory or on an external device, like a memory card or flash drive. FANUC controls will interpret CNC commands a bit differently than Custom Macro (arithmetic and logic) commands.

### Improve CNC Productivity with Parametric Programming

CNC Programming with the use of Fanuc Custom Macro B, enables you to design and implement powerful, advanced CNC macro programming techniques that result in unparalleled accuracy, repeatability, and enhanced productivity (ideal for a family of parts). The course begins with step-by-step instructions and then gradually proceeds in complexity.
