Coastal zone, triple interface of land, ocean and air, is a geographic entity of intense human activities. This area experiences several problems due to competing and multiple usability of coastal resource, which is a matter of global concern. Concept of Integrated Coastal Zone Management (ICZM) is advanced as a tool to tackle these problems and to devise sustainable development plans.

[PDF] Geomorphology for Integrated Coastal Zone Management ...

Geomorphology. Coastal lagoons and strandplain-associated coastal creeks are small, shallow basins that have very low (or negligible) freshwater input (see Examples below). In Australia, they are most abundant on the south-east coast, south-west coast, and in the Gulf of Carpentaria.

Coastal lagoons and strandplain associated creeks - OzCoasts

Ecological memory (Phillips, 1999a, Thompson et al., 2001) is another prominent theme that ties geomorphology and ecology together under the framework of complexity. Ecological memory encompasses how a subset of abiotic and biotic components are selected and reproduced by recursive constraints on each other.

Geomorphology and ecology: Unifying themes for complex ...

He has authored and co-edited numerous books on coastal problems, environmental challenges and global environmental change. Christine Embleton-Hamann is a Professor in the Department of Geography and Regional Research at the University of Vienna. Her main interest is in alpine environments.
