Anthropocene, and predictions of our common future through research articles, reviews and commentaries.

## **Earth's Future - Wiley Online Library**

For the past 3 million years, Earth's climate has been in an Icehouse state characterized by alternating glacial and interglacial periods.

Modern humans

# Acces PDF Earths Climate Past And Future 1st First

evolved during this time, but greenhouse gas emissions and other human activities are now driving the planet toward the Warmhouse and Hothouse climate states not seen since the Eocene epoch, which ended about 34 million years ago.
