Read Book Fuel Pump Fuse 99 Toyota Celica

There is no "fuel pump relay" per se. The fuel pump is controlled by the action of the EFI relay and the Circuit Opening Relay. The EFI relay is on the fuse panel under the hood, and, the Circuit opening relay is on a small panel under the left side of the dash, located right next to an identiacrl relay; the C-O relay would be the relay located on the right side of this small panel.
