Hal Varian Microeconomic Analysis Solutions

Pareto efficiency or Pareto optimality is a situation where no individual or preference criterion can be better off without making at least one individual or preference criterion worse off or without any loss thereof. The concept is named after Vilfredo Pareto (1848-1923), Italian civil engineer and economist, who used the concept in his studies of economic efficiency and income distribution.

Pareto efficiency - Wikipedia

Information economics or the economics of information is the branch of microeconomics that studies how information and information systems effect an economy and economic decisions.. One application considers information embodied in certain types of commodities that are "expensive to produce but cheap to reproduce." Examples include computer software (e.g., Microsoft Windows), pharmaceuticals ...
