The IEC 60529 test standard considers a rating of two as protection from solid objects greater than 12.5 mm. An IP of three means IP ingress protection against solid objects greater than 2.5 mm. Enclosures rated four offer protection from items that are solid objects greater than one mm.

IEC 60529 IP Code Testing | Keystone Compliance

The protection of enclosures against ingress of dirt or against the ingress of water is defined in IEC529 (BSEN60529:1991). Conversely, an enclosure which protects equipment against ingress of particles will also protect a person from potential hazards within that enclosure, and this degree of protection is also defined as a standard.

Below is a brief description of the two types of dripping water tests included in ingress protection testing from IEC 60529. IPX1 Testing: Defined as dripping water with vertically falling drops. The requirement is that the equipment under test (EUT), shall experience no harmful effects from the dripping water.

IPX1 & IPX2 Dripping Water | Keystone Compliance

The IEC standard 60529 provides you with a more detailed guide than more generic marketing terms often applied when talking about water resistance. This means you can determine the exact levels of protection against moisture. Instead of an item simply being “waterproof”. An IP rating is, in summary, a two digit code.

IP Ratings Explained: The "waterproof" IEC standard 60529 ...

NEMA ratings and IP ratings both define degrees of protection

against substances such as water and dust, but use different test methods and parameters to define their enclosure types (NEMA 250 and IEC standard 60529).

What is the difference between NEMA and IP ratings?

NEMA and IEC differ in the following ways: NEMA addresses construction. It discusses minimum design requirements for enclosures. IEC identifies ingress protection levels (IP ratings). IEC standards for electrical enclosures are related to ingress protection levels (also known as IP ratings). NEMA uses types.

NEMA vs. IEC Classifications - Two Popular Standards

INTERNATIONAL ELECTROTECHNICAL COMMISSION (IEC)
STANDARD 60529 The IEC is the world's leading organization that prepares and publishes International Standards for all electrical, electronic and related technologies — collectively known as electrotechnology.
