Invertebrates For Exhibition Insects Arachnids

Animal sexual behaviour takes many different forms, including within the same species. Common mating or reproductively motivated systems include monogamy, polygyny, polyandry, polygamy and promiscuity. Other sexual behaviour may be reproductively motivated (e.g. sex apparently due to duress or coercion and situational sexual behaviour) or non-reproductively motivated (e.g. interspecific ...

Animal sexual behaviour - Wikipedia

Insects. Explore the fascinating world of insects from beautiful butterflies to creepy crawly cockroaches! The Australian Museum Entomology collection contains mostly Australian species, but there is a significant non-Australian representation of beetles, psocids (booklice), flies, butterflies and moths.

Thylacine - The Australian Museum

Ancient Egyptian embalmers rubbed various oils and resins on the corpse, most likely to both prevent insects from consuming the body and to mask decomposition odors. [20] The 1999 movie The Mummy used real grasshoppers (in addition to computer generated images). The real grasshoppers were refrigerated to make them more sluggish and therefore ...
