[Book] How To Remove A Mercruiser 140 Engine

The Mercruiser 3.0 MPI has a four-stroke, four-cylinder engine. This engine's cylinder bore has a diameter of 4 inches and the a stroke piston length of 3.6 inches. The compression ratio of this engine is 9.3 to 1. This engine is thermostatically cooled but also uses raw water at times.

Technical Information on the MerCruiser 140 | It Still Runs

There are several other benefits in this case with the 3.0L being that this is the exact same engine which is/was used by Mercruiser and Volvo Penta to build their respective products. Another great benefit with the new longblock is that General Motors began supplying the engine with a new electronic ignition system to address the historical issues this engine suffered with head gaskets ...
