EnLighting: An Indoor Visible Light Communication System based on Networked Light Bulbs

Doing video in traditional buildings is especially difficult because the of the light coming from hanging fixtures and chandeliers. Often there's little or no light aimed directly at the podium. Some churches "fix" this with consumer solutions like track lighting.

Lighting Your Live Stream - Church Production Magazine

Visible light communication (VLC) is a data communications variant which uses visible light between 400 and 800 THz (780-375 nm). VLC is a subset of optical wireless communications technologies.. The technology uses fluorescent lamps (ordinary lamps, not special communications devices) to transmit signals at 10 kbit/s, or LEDs for up to 500 Mbit/s over short distances.

Visible light communication - Wikipedia
