Nervous System Study Guide Flashcards | Quizlet

All the parts of the nervous system except the brain and the spinal cord belong to the peripheral nervous system. The peripheral nervous system has two parts: the somatic nervous system and the autonomic nervous system. The Somatic Nervous System . The somatic nervous system consists of nerves that connect the central nervous system to voluntary skeletal muscles and sense organs. Voluntary skeletal muscles are muscles that help us to move around.

Neurons, Hormones, and the Brain: The Nervous System ...

Motor neurons convey signals from the central nervous system to peripheral targets - the muscles and glands. The peripheral nervous system can be further divided into two systems, depending on the function of the parts of the body they connect to. These two systems are the autonomic and somatic nervous systems.
