Psychology became a science in the nineteenth century. The roots of this new science were many. Philosophers provided psychology's conceptual framework: physiologists provided knowledge of the nervous system and experimental methods; and social reformers and psychiatrists provided motives for using science to improve the human condition.

History of Psychology in the Nineteenth Century

Many distinctively modern theories subsumed the former under the latter: both the naturalistic theories of Hobbes and Spinoza, on the one hand, and the moral sense theories of Hutcheson and Hume, on the other, held that we project the value of the object from the affective quality of the emotion, although Hume allows for complications in how we experience the valences of a passion as belonging ...

The 19th century brou'ght about many books on color theory and how it can be applied to the visual arts. Authors often looked to nature for the hues and tones that make up the color wheel and their publications are still coveted color manuals today. For instance, Werner's Nomenclature of Colours, which is also available online, was used by Charles Darwin as a scientific tool.
