Preterm birth, also known as premature birth, is the birth of a baby at fewer than 37 weeks gestational age, as opposed to full-term delivery at approximately 40 weeks. Extreme preterm is less than 28 weeks, very early preterm birth is between 28-32 weeks, early preterm birth occurs between 32-36 weeks, late preterm birth is between 34-36 weeks' gestation.

Preterm birth - Wikipedia

This diploma course introduces you to basic anatomy and covers the physiology, features and functions of the important systems of the human body.

Modules: Earn a Diploma in Human Anatomy and Physiology in ... - Alison

Seasonal breeders are animal species that successfully mate only during certain times of the year. These times of year allow for the optimization of survival of young due to factors such as ambient temperature, food and water availability, and changes in the predation behaviors of other species. Related sexual interest and behaviors are expressed and accepted only during this period.
