Philosophy Mind And Cognitive Inquiry

Philosophy of psychology is concerned with the philosophical foundations of the study of psychology. It deals with both epistemological and ontological issues and shares interests with other fields, including philosophy of mind and theoretical psychology. Philosophical and theoretical psychology are intimately tied and are therefore sometimes used interchangeably or used together.

Philosophy of psychology - Wikipedia

Philosophy (from Greek: φιλοσοφία, philosophia, 'love of wisdom') is the systematized study of general and fundamental questions, such as those about existence, reason, knowledge, values, mind, and language. Such questions are often posed as problems to be studied or resolved. Some sources claim the term was coined by Pythagoras (c. 570 - c. 495 BCE); others dispute this story ...

Consciousness (Stanford Encyclopedia of Philosophy)

Cognitive Science is an interdisciplinary field of inquiry that is concerned with the acquisition, representation, and use of knowledge by individual minds, brains, and machines, as well as groups, institutions, and other social entities. ... It will cover topics from the philosophy of mind, cognitive linguistics, neuroscience, psychology, and ...

Cognitive Science < University of California, Berkeley

John Dewey (1859—1952) John Dewey was a leading proponent of the American school of thought known as pragmatism, a view that rejected the dualistic epistemology and metaphysics of modern philosophy in favor of a naturalistic approach that viewed knowledge as arising from an active adaptation of the human organism to its environment. On this view, inquiry should not be understood as consisting ...
