1. Introduction. Physical inactivity among older adults is a major health risk that accounted for \$54 billion worldwide in direct healthcare costs in 2013 (World Health Organization [WHO] 2019). 1 The WHO's action plan to create a healthier world by 2030 states that promoting older adults' physical activity is key to preventing disease and enhancing quality of life in this population.

How the use of mobile fitness technology influences older ...

Aragonite is a carbonate mineral, one of the three most common naturally occurring crystal forms of calcium carbonate, CaCO_3 (the other forms being the minerals calcite and vaterite). It is formed by biological and physical processes, including precipitation from marine and freshwater environments. The crystal lattice of aragonite differs from that of calcite, resulting in a different crystal ...

Aragonite - Wikipedia
