Principles of Physical Geography | Nature

Physical geography This comprehensive study is concerned with the solid rocks, the seas and oceans, our enveloping atmosphere, the soil and the "green mantle" of natural vegetation--as they interrelate in man's physical environment.

Principles of Physical Geography by Francis John Monkhouse ...

The principles of geography are those that must be met by those involved in any study of this science. Among these principles are the location, the description or the comparison. By using them, a correct development is achieved in any investigation or geographical description. The term geography comes from the Greek words "Gea", which means Earth, and "grafia", whose meaning is "description".
