This book combines Software Defined Radio (SDR) and Digital Signal Processing (DSP) principles into a single, readable, form and uses that knowledge to build the T41-EP; a 20W, HF 5 band, CW/SSB transceiver (SDT) with features not always found in commercial radios costing ten times as much.The T41-EP is a self-contain SDT that does not require an external PC, laptop, or tablet to use.

Software Defined Radio Transceiver: Theory and Construction of the T41 ...

Radio is the technology of signaling and communicating using radio waves. Radio waves are electromagnetic waves of frequency between 30 hertz (Hz) and 300 gigahertz (GHz). They are generated by an electronic device called a transmitter connected to an antenna which radiates the waves, and received by another antenna connected to a radio receiver.Radio is very widely used in modern technology ...
