Functions Review for Mastery: (continued) From a given rule for a relation, you can write a table of values. Choose convenient x -values (domain or input). Get corresponding y -values (range or output). $y = 2x + 1$ Write a table of values for each function and graph. 5. $y = x^2 + 1$ $y = 2x + 1$ $y = x^2 + 1$ $y = 2x + 1$ $y = x^2 + 1$ $y = 2x + 1$

8-1 Review for Mastery: Functions

Review for Mastery Writing Functions continued After identifying the independent and dependent variables, you can write a rule in function notation. Remember that $f(x)$ is the dependent variable and x is the independent variable. Identify the dependent and independent variables. Write a function rule for each situation.

4-3 Writing Functions - Kristin Saracco

Review for Mastery Identifying Linear Functions You can determine if a function is linear by its graph, ordered pairs, or equation. Identify whether the graph represents a linear function. Step 1: Determine whether the graph is a function. Every x -value is paired with exactly one y -value; therefore, the graph is a function. Continue to step 2.
