Divided into three parts, the Third Edition begins by presenting the fundamentals and foundations of probability.

An Introduction to Probability and Statistics - Vijay K ...

Solution to Problem 1.8. Let p_i be the probability of winning against the opponent played in the i th turn. Then, you will win the tournament if you win against the 2nd player (probability p_2) and also you win against at least one of the two other players [probability $p_1 + (1 - p_1)p_3 = p_1 + p_3 - p_1p_3$]. Thus, the probability of winning the ...

An Introduction to Probability and Statistics : Vijay K ...

460 Full solutions from MIPS: DO NOT DISTRIBUTE 2.19a We need at least two days to see two heads, hence $Q = f_{2;3;4;...;g}$: 2.19b It takes 5 tosses if and only if the fifth toss is heads (which has probability p), and exactly one of the first 4 tosses is heads (which has probability $4p(1-p)^3$). Hence the probability asked for equals $4p^2(1-p)^3$:
