What Is D Answers For

The hint concerning the color of [Co(en) 2 Cl 2] + is useful because the enantiomerically resolvable form of this ion must be the cis isomer (the trans isomer is not optically active). This suggests that the violet salt, CoCl 3 ·4NH 3, must have a cis structure, as well, shown below. The air oxidation of CoCO 3 gives the pink cis-chelate complex:. Addition of HCl causes an acid/base reaction ...

Vitamin D toxicity, also called hypervitaminosis D, is a rare but potentially serious condition that occurs when you have excessive amounts of vitamin D in your body. Vitamin D toxicity is usually caused by large doses of vitamin D supplements — not by diet or sun exposure.

Vitamin D toxicity: What if you get too much? - Mayo Clinic

Chabad.org, like many Jewish print and online publishers, is particular to not spell out the name of our Creator, even in English. Rather, we write " G-d." Here's why: Following the Torah 's instruction to "obliterate the name" of idolatry in the Land of Israel,1 the Torah warns us not to do the same to G-d. We thus learn that there is a prohibition to erase G-d's name.2 ...

Why Write "G-d" Instead of "G-o-d"? - Questions & Answers
