Now run a cycle that requires heat, like Permanent Press or Normal Dry. If the dryer will not stop on those cycles, then the issue is the temperature sensor in the dryer and the dryer needs a new timer resistor. The timer and timer resistor are inexpensive parts. With a bit of time and effort and a good repair guide, you can make the repairs.

This is the most common symptom we hear on all brands of dryers. One of the appliance parts most of us suspect first is the heating element (see common Whirlpool elements below), but there are several other appliance parts on the dryer and one item that is not on the dryer that can produce the same symptom. You will save time, energy,
